Enrolment and Course Access

eCollege Login

Once you have activated the course, you will always login to eCollege here: www.ecollege.ie.

eCollege Password

If you forget your password, you can use the password reset option on eCollege:

https://ecollege.etbonline.ie/login/forgot_password.php

Course Start Date

The course starts once you have logged into eCollege. We run this course on a continuous intake basis. You may see other start dates on Fetch Courses; these are incorrect.

Course Length

We allow **26** weeks to complete the course, and we suggest you will need to study for about 10 hours a week. Based on previous statistics, many learners complete this course in less than **16** weeks.

There are approximately **25** contact hours within the interactive tutorials and **30** hours of practice Labs, you may have to go back over specific topics. There is also a portion of self-directed learning involved.

eCollege Course Structure

We have laid out the course structure with these topics:

- Getting Started
- Course Resources
- Course Content (multiple topics)
- Test Preparation
- Exam Booking

Getting Started Topic

The Getting Started topic includes:

- Induction Module
 - Online Learning
 - eCollege Policies and Procedures
 - Workstation Safety
- Getting Started Questionnaire

- Provides you with valuable course information. We also ask some questions concerning your employment and education status.

Course Resources Topic

The Course Resources topic includes exam information, the course syllabus, recommended reading, information on Networking Basics and a learning plan. You can use these resources as you progress through the course.

Course Content Topics

All course work is included in the following 16 Course Content topics:

1. Linux Basics and Scripting
2. Identifying Social Engineering and Types of Attacks
3. Explaining Threat Actors and Threat Intelligence
4. Performing Security Assessments
5. Compare Security Roles and Security Controls
6. Implementing Secure Cloud Solutions
7. Application Development, Deployment, and Automation
8. Implementing Authentication Controls
9. Explaining Physical Security
10. Summarising Basic Cryptographic Concepts and Implementing Public Key Infrastructure
11. Implementing Host Security Solutions
12. Implementing Secure Network Designs and Protocols
13. Implementing Secure Mobile Solutions
14. Performing Incident Response and Digital Forensics
15. Explaining Data Privacy and Protection Concepts
16. Summarising Risk Management Concepts

Test Preparation Topic

The Test Preparation topic helps ensure you are ready for your examination. You will complete activities that prepare you for the examination. You must achieve a certain percentage in these activities before moving on to the Exam Booking stage.

Exam Booking Topic

In the Exam Booking topic, you will complete the Course Questionnaire and Exam Booking Form to help guide you through the exam booking process.

Course Information and Syllabus

Prerequisites

We recommend that students first complete the CompTIA Network+ course provided by eCollege. Two years of experience in IT administration with a security focus would also be an advantage. Aside from this academic and professional experience, we expect prospective students to have a high level of computer literacy with a high aptitude for logical thinking and problem-solving.

Course Information

The CompTIA Security+ certification is an internationally recognised industry-standard qualification for anyone in an IT role, held by more than half a million people worldwide.

This online course will teach you the most important foundational principles for securing a network and managing risk. The syllabus will also cover access control, identity management and cryptography, as well as the selection of appropriate mitigation and deterrent techniques to address network attacks and vulnerabilities. This vendor-neutral certification will also raise your understanding of security concerns associated with cloud computing, BYOD (bring your own device) and SCADA (supervisory control and data acquisition).

You can review the course syllabus [here](#).

QQI/FETAC

There is no QQI/FETAC qualification associated with this course.

Certification

Upon successful completion of the examination, you will be awarded an industry qualification from CompTIA. See more information [here](#).

Examination

Exam Costs

SOLAS will cover the cost of your exam.

Exam Format

- The CompTIA Security+ exam (**SYO-601**) will certify the successful candidate has the knowledge and skills required to install and configure systems to secure applications, networks, and devices; perform threat analysis and respond with appropriate mitigation techniques; participate in risk mitigation activities; and operate with an awareness of applicable policies, laws, and regulations. The successful candidate will perform these tasks to support the principles of confidentiality, integrity, and availability.
- Maximum of 90 multiple-choice and performance-based questions
- Passing score: 750 (on a scale of 100-900)
- Time Limit: 90 minutes

Register for the Examination

You will be able to register for the exam once you have completed all the topics, including the Test Preparation topic. After these are all successfully completed, the Exam Booking topic will be available to you.

At this point, eCollege administration staff will work with you to purchase the exam from Pearson VUE. This process will require you to create a Pearson VUE account and complete a registration form for them.

Where Can I Complete My Examination?

You can choose a Pearson VUE Test Centre that is convenient for you on the Exam Booking Form. You can also choose to sit your exam [online](#) (at home). Once the Exam Booking Form is submitted, eCollege will send you an exam voucher, and you will be able to book your exam with Pearson VUE.

Refund of Public Travel Expenses

You may have to travel to a test centre; we can refund the cost of any public transport used. Please keep your receipts.

Exam Support

If you require accommodation (support for any documented learning difficulties), you need to apply for this in advance. Any request for additional support **will require documented evidence** from a medical professional.

We cannot request additional support on your behalf due to data protection. There is no requirement to start this process now. You will be able to do this once you have reached the Exam Booking topic.

Course Content

Live Classes

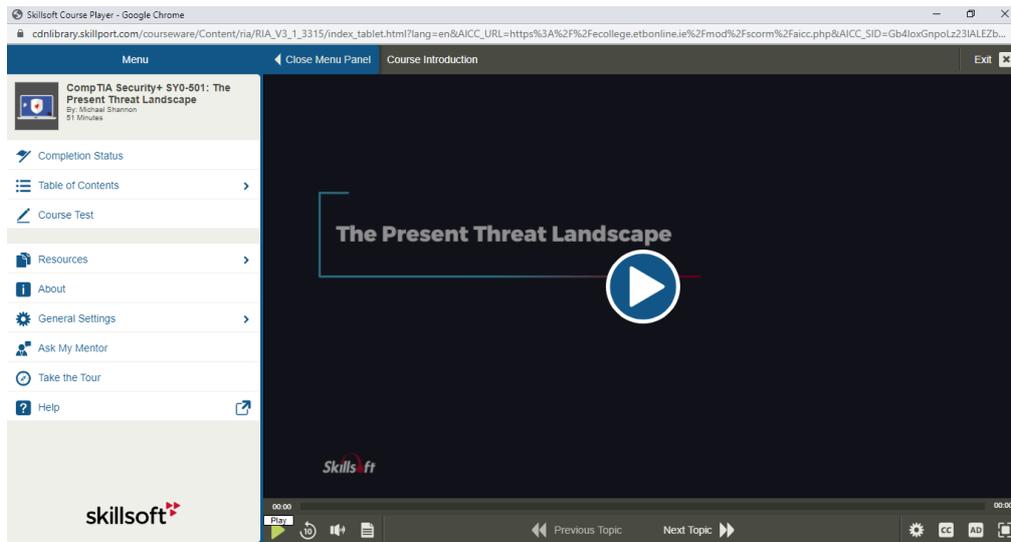

There are no live classes. The course content is laid out for you in interactive tutorials that can be accessed anytime once you are logged into eCollege.

Skillsoft Interactive Tutorials

Course content is created and designed by a company called Skillsoft. Skillsoft supplies eCollege with interactive tutorials aligned to the course syllabus. These interactive tutorials are found within each topic. They cannot be viewed offline.

Within the Topic, Skillsoft interactive tutorials appear like this:

These icons launch Skillsoft video content.

Skillsoft Interactive Tutorials – Transcripts

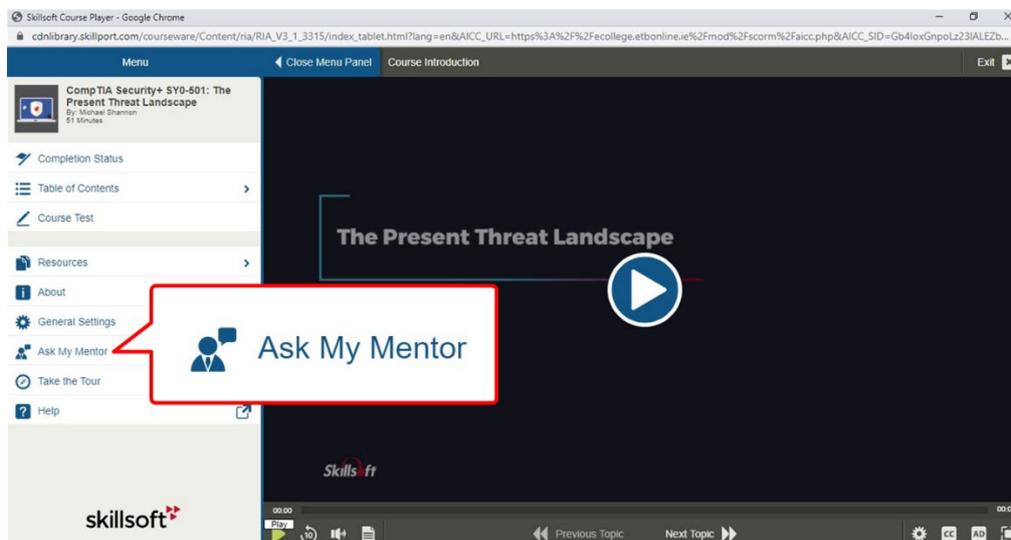

Skillsoft supply transcripts of the interactive tutorials. Transcripts are found within each interactive tutorial.

Skillsoft Interactive Tutorials - Ask My Mentor

**Separate from eCollege eTutor support. Mentors can only answer queries on the Skillsoft interactive tutorial you are reviewing.*

Skillsoft also provides the **Ask My Mentor** support service, which you can access while you are in your course.

eBooks

A series of recommended eBooks and additional reference materials are available in the Course Resources topic.

How to approach the course

Once you have completed all the activities in the Getting Started topic, Course Resources and Course Content material will be unlocked and available to you.

You will progress through each course topic in order. Course Content topics focus on the course material supplied by Skillsoft

The screenshot displays the course navigation interface for CompTIA Security+ SY0-601. At the top, the course title "CompTIA Security+ SY0-601" is centered. Below the title are four navigation buttons: "Course Handbook", "Technical Support", "Forums", and "Exam Info". The main content area is a grid of course topics, each represented by a colorful icon and a title. The topics are arranged in four rows and five columns. The first row includes "Getting Started - Click here" (START), "Course Resources", "Linux Basics and Scripting", "Lesson 1" (IDENTIFYING SOCIAL ENGINEERING AND MALWARE), and "Lesson 2" (EXPLAINING THREAT ACTORS AND THREAT INTELLIGENCE). The second row includes "Lesson 3" (PERFORMING SECURITY ASSESSMENTS), "Lesson 4" (COMPARE SECURITY ROLES AND SECURITY CONTROLS), "Lesson 5" (IMPLEMENTING SECURE CLOUD SOLUTIONS), "Lesson 6" (IMPLEMENTING CYBERSECURITY RESILIENCE), and "Lesson 7" (IMPLEMENTING AUTHENTICATION CONTROLS). The third row includes "Lesson 8" (EXPLAINING PHYSICAL SECURITY), "Lesson 9" (SUMMARIZING BASIC CRYPTOGRAPHIC CONCEPTS AND IMPLEMENTING PUBLIC KEY INFRASTRUCTURE), "Lesson 10" (IMPLEMENTING HOST SECURITY SOLUTIONS), "Lesson 11" (IMPLEMENTING SECURE NETWORK DESIGNS AND PROTOCOLS), and "Lesson 12" (IMPLEMENTING SECURE MOBILE SOLUTIONS). The fourth row includes "Lesson 13" (PERFORMING INCIDENT RESPONSE AND DIGITAL FORENSICS), "Lesson 14" (EXPLAINING DATA PRIVACY AND PROTECTION CONCEPTS), "Lesson 15" (SUMMARIZING RISK MANAGEMENT CONCEPTS), "Test Preparation Section", and "Exam Booking".

How to approach the first topic

<p>1</p>	<p>Topic Objectives: Review the Topic Objectives.</p>	<p>1 Topic Objectives</p> <p> Topic Objective</p>
<p>2</p>	<p>Interactive Course Material: Review the interactive tutorial, click to open and click Start Course.</p> <p>Start Course </p> <p>Review the table of contents and complete all parts of the tutorial.</p>	<p>2 Interactive Course Material</p> <p>Please review the following activities.</p> <p>You must achieve $\geq 80\%$, in the course test within, to complete these activities:</p> <ul style="list-style-type: none">  Social Engineering Techniques & Attack Types  Microsoft Docs (Ransomware)(EL)  Analyzing Application & Network Attacks  NIST.8529_IOT PDF  REMnux Linux distribution (EL)  Case Study on Password Spraying (EL)
<p>3</p>	<p>Practice Labs: The Practice Labs platform offers an environment where you can access live IT systems in real-time. By completing the lab tasks, you will improve your practical skills in infrastructure, networking concepts, network operations, security, networking troubleshooting and tools.</p>	<p>3 Practice Labs</p> <ul style="list-style-type: none">  Identifying Different Cyber Attacks  Social Engineering Techniques and Exploits  Identifying Indicators of a Network Attack
<p>4</p>	<p>Assignment: You will be given assignments to complete that are relevant to the topic.</p>	<p>4 Assignment</p> <p>Extract a file from a Wireshark capture file - you must receive 100% in this assignment.</p> <p><i>Wireshark is a free protocol analyser.</i></p> <ol style="list-style-type: none"> 1. Download and install Wireshark (the Microsoft Windows version can be found in the 'Course Resources' topic) 2. Download the sample capture file below, and open it in Wireshark 3. Tutorial for the application can be found here. A good knowledge of Wireshark is an advantage. 4. From the 'file' menu below, click: Export -> Objects -> HTTP 5. Using the list of objects shown, which animal do you see? 6. With this answer, in the following quiz below, choose the correct option from the multiple choice. <ul style="list-style-type: none">  Download - Wireshark Sample Capture file  Quiz - Wireshark Question

Quiz Section:

Some Topics may also have a Quiz Section. This is a mini-quiz to test your knowledge of the topic. You must achieve a score of 100% to move on.

Review the forums, and ask a question of your fellow participants if you wish to transfer knowledge.

Once you complete all steps for the topic, you can move to Topic 2 and repeat the process.

eCollege Support

We have a reliable support system in place, and you can contact us via email for any questions or concerns. You can request a phone call if you wish to speak to eCollege.

eTutor

There is an eTutor assigned to your course who is available via email if you have any subject matter-related queries. Your eTutor will email you to welcome you to the course. You can also see their contact information on the course homepage.

Administration and Helpdesk

We have a team of administrators who can help with general course questions and technical support.

Technical Requirements

Most eCollege courses will require you to have a Windows PC, especially any Microsoft courses. Other courses may allow the use of an Apple device.

We recommend:

- Dual-core processor
- 4GB of RAM or higher
- The latest up-to-date operating system
- Chrome or Firefox web browser
- Minimum screen resolution of 1024 X 768
- High-speed broadband – we do not recommend the use of mobile dongles

A printer is not required.

Pop-Ups

You must enable popups to allow the interactive course material to run. Please add the following URL as an authorised site for popups: <https://ecollege.etbonline.ie/>. Do not turn off popup blockers completely.

How to do this per browser:

- [Chrome](#)
- [Firefox](#)
- [Internet Explorer](#)
- [Edge](#)

eLearning General Information

We know that eLearning has challenges that can prevent you from absorbing the content and critical aspects of the course.

We are also aware that you may be on the go and don't have a lot of time to devote to the eLearning experience.

You can overcome this by engaging your course in bite-sized chunks when you are ready to learn. You should also avoid lengthy study sessions; by doing this, you give yourself the chance to acquire and retain information more effectively.

We also offer the opportunity for peer collaboration through the various discussion forums within the course, where learners can collaborate on the subject matter. If you have a specific issue with the course, we advise you to contact the eCollege team.
